5.3 Formulating Instructions

Learn

Follow the path. Find the object.

Teacher's Note

Teacher may give enough practice on the directions (Upward, Downward, Left, Right) before starting the game.

Procedure : The game may be played indoor or outdoor. Draw squares and place the objects or toys as shown above. Select any student randomly and play the game with the student as follows.

Teacher : Move 2 squares right.
(shows the signs to emphasise the idea)

Student : Yes. Then..

Teacher : Move 1 square downward.

Student : Yes. I got the ball.

Student has to show the object what he has got on the place. Continue the same with other student for another object.
